

FRONT LABEL - what the LCBO flagged

Red boxes = must change. Numbers match the notes on the right. Everything not boxed passed review.

1 Maple leaf - official symbol

LCBO: national symbols need WRITTEN permission from the Department of Canadian Heritage, sent to quality.services@lcbo.com. Also reads as a Canadian-origin claim, which is not allowed when foreign ingredients exceed 2% (the cardamom is imported from India). **Do this: remove the maple leaf (fastest). Fill space with a butterfly or cardamom motif if the top looks empty.**

2 Common name - not acceptable

"Natural Flavored Vodka" is English only and is not the legal name. This is a NON-standardized product (flavoured, 35%), so the common name must be "Flavoured Vodka" in English AND French. **Change to: Flavoured Vodka / Vodka aromatisée** (Canadian spelling "Flavoured" recommended. Keep red colour and style.)

3 "Canadian Vodka / Vodka canadien" - must be removed

Two problems: (a) the product is not a standardized "Vodka", so the word cannot be used as the name; (b) "Canadian" is an origin claim that fails the 98% Canadian-content rule with imported cardamom. **Do this: delete the whole line. Keep "PREMIUM HANDCRAFTED".** ("Ontario Small Batch" was not flagged and can stay.)

✓ Passed - no change needed

750 ml net quantity, 35% alc./vol., single field of vision, barcode presence and position, dealer name and address (on back).

BACK LABEL - what the LCBO flagged

Red boxes = must change. Numbers continue from the front label.

Inspired by the rich spice traditions of India, Red Admiral Cardamom Bliss Vodka brings the distinctive character of cardamom to our crisp and clean vodka. Our signature Red Admiral Vodka is naturally infused with Cardamom pods. The Result is a beautifully aromatic vodka that captures the true character of the spice while maintaining the smooth, clean profile of our vodka.

Cardamom is known for its complex and refreshing character. Its aroma is naturally floral, citrusy and gently herbal, while its palate offers a subtle warmth with hints of fresh spice and a lingering, refreshing finish. Naturally Flavored Cardamom Vodka allows the natural character of cardamom to shine through. No sugar added.

Ingredients:

Authentic Indian Cardamom is used to flavor.

Ingrédients :

De l'authentique cardamome indienne est utilisée pour aromatiser.

NBDISTILLERS.COM
PRODUCED BY / PRODUIT PAR:
CANADIANA ORGANIC DIST CORP.
NIAGARA REGION, WELLAND, ONTARIO, CANADA

4 "No sugar added." - claim triggers two failures

(a) Any nutrient claim on an alcohol label makes a full bilingual Nutrition Facts table mandatory - the label has none.

(b) The claim itself must also appear in French ("Sans sucre ajouté").

Do this: delete the sentence "No sugar added." - both issues disappear.

(Only keep it if you are willing to add a full Nutrition Facts / Valeur nutritive table plus lab analysis. Not worth it for this SKU.)

5 Ingredient list - wrong format and incomplete

Current text is a marketing sentence, not an ingredient list.

Rules: title in BOLD, all ingredients by common name, in descending order by weight, black type on white/neutral background, boxed or ruled.

Replace with: Ingredients: Vodka, cardamom.

Ingrédients : Vodka, cardamome.

If any natural flavour extract or sugar syrup is added, it must be listed too (e.g. "natural flavour / arôme naturel").

6 Canadian flag - official symbol + origin claim

Same rule as the maple leaf: written permission from Canadian Heritage or remove. It also implies "Product of Canada" which is not allowed with >2% imported ingredients.

Do this: remove the flag. The address line "Welland, Ontario, Canada" already tells the buyer where it is made and is allowed.

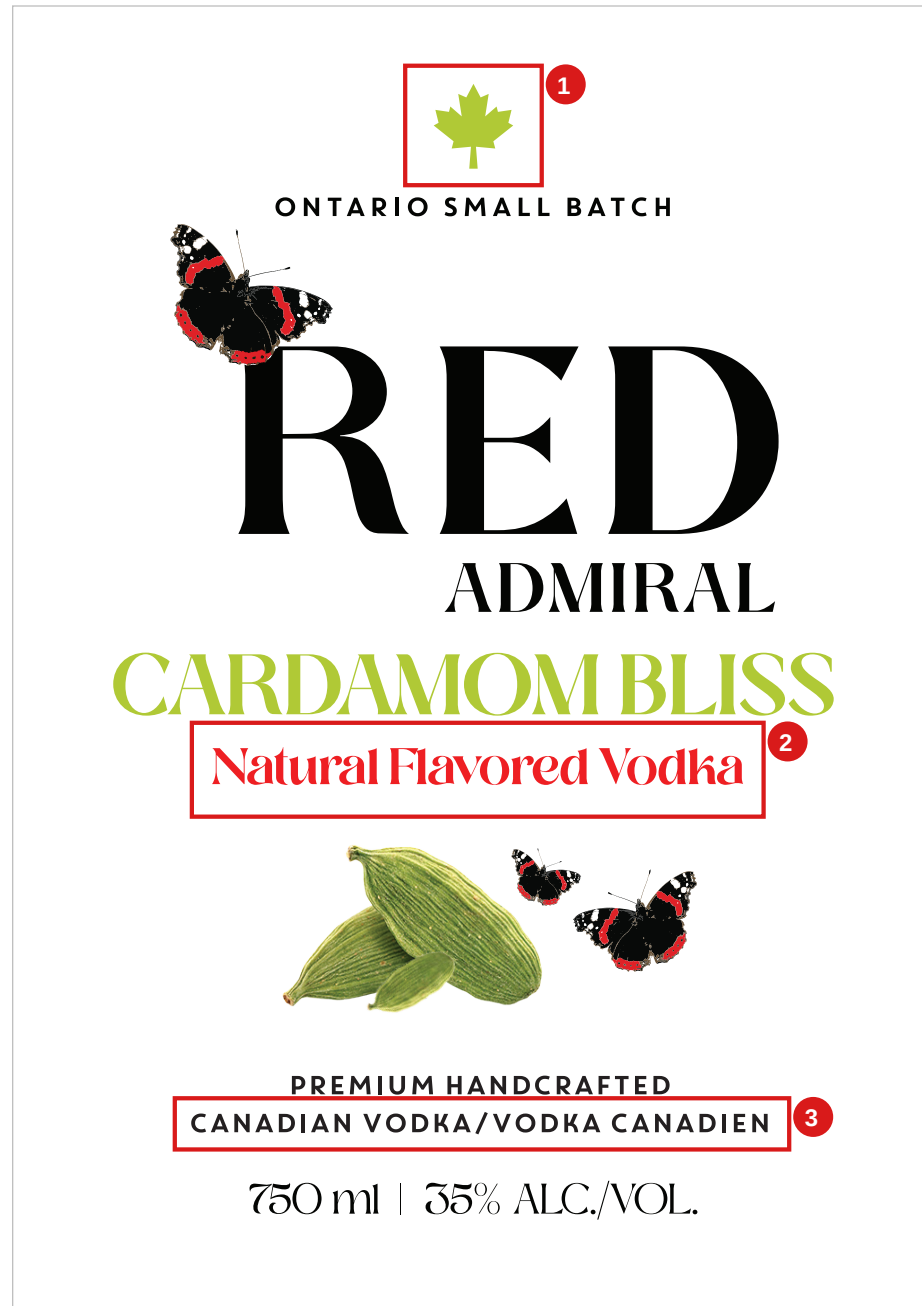

✓ Passed - no change needed

Produced by / Produit par + address, website, barcode, drink responsibly line, brand story text (see optional notes on page 5).

FRONT LABEL - before / after (corrected mock-up)

Mock-up uses substitute fonts. Designer should re-set the new text in the label's own typefaces (LostaMasta for the red line).

BEFORE (submitted)

AFTER (corrected)

BACK LABEL - before / after (corrected mock-up)

Ingredient box shown in Helvetica; designer can use Baloo 2 Bold / Regular as long as the title stays bold and the type is black on white.

PLAIN-WORDS CHANGE LIST + resubmission steps

Copy this to the designer. Six edits, all deletions or text swaps - no layout rebuild needed.

#	Where	Current	Change to	Why (LCBO wording)
1	Front, top	Green maple leaf	Delete (or send Canadian Heritage permission letter)	Official symbol; origin claim fails >2% foreign ingredients
2	Front, red line	Natural Flavored Vodka	Flavoured Vodka / Vodka aromatisée	Common name must be 'flavoured vodka', bilingual
3	Front, bottom	CANADIAN VODKA/VODKA CANADIEN	Delete the line	'Canadian vodka must be removed'
4	Back, story text	...to shine through. No sugar added.	...to shine through.	Claim needs Nutrition Facts table + French; delete instead
5	Back, ingredients	Ingredients: Authentic Indian Cardamom is used to flavor. (+FR)	Ingredients: Vodka, cardamom. / Ingrédients : Vodka, cardamome. (titles bold, boxed)	Wrong format, incomplete; descending order by weight
6	Back, bottom right	Canadian flag	Delete	Official symbol; same as #1

Resubmission steps

1. Designer applies the six edits above to FRONT and BACK source files (Illustrator/InDesign), exports print-ready PDFs.
2. Confirm with the distiller exactly what goes in the bottle: if a cardamom extract, sugar or glycerin is added, it must be in the ingredient list.
3. Check ingredient-list type size on a printed proof (LCBO does not measure it; the supplier is responsible). Keep it black on white, title bold.
4. Optional but recommended: change 'Flavored' to Canadian spelling 'Flavoured' in the back story text for consistency with the common name.
5. Resubmit through the same submission (ID 1269748). If you insist on keeping the maple leaf or flag, email the Canadian Heritage permission letter to quality.services@lcbo.com; expect weeks of delay - removal is the practical route for this launch.
6. Not flagged but worth a look: 'Ontario Small Batch' and 'Premium Handcrafted' passed; '35% alc./vol.' passed because the product is non-standardized. Do not add 'Vodka' on its own anywhere else on the label or the 40% vodka standard question comes back.
